

Divorce Settlement Checklist

Every relationship is unique. However, when you structure a divorce, dissolve a domestic partnership or mediate any matrimonial dispute, there are broad categories of concerns you must address. Decisions must be made about parenting, equitable distribution of assets, debts and liabilities; spousal and child support; taxes, and the financial futures of both partners and all children.

The questions listed on the following pages are offered **only** to help you understand the various decisions that *might* need to be made. This list is intended to give you a general idea about the issues that might demand your attention and discussion.

You can highlight the questions that are most relevant to you as you read through it and use the lines at the end of this list to jot down any issues that you are most concerned about.

Do not try to answer all these questions!

At our meetings we will work through the issues relevant to you together.
